21st January, 2019

Dear Parents

Year 8 ART Curriculum Day Wednesday 30th January 2019

This half term your son/daughter will be taking part in a Curriculum Day in which they will be encouraged to respond to the theme of Plastics in the Oceans. It is intended that students will work like an Artist, and respond visually to the headlines, news, information and images available on the effects of plastic waste on marine life and the environment.

As part of this one-day workshop students will be modelling using wire and plastic. It is intended that students will work collaboratively and will have the opportunity to explore the themes of recycling, re-using and minimising plastic waste.

I would like to ask that on this day, in support of the project your son/daughter brings in some clean plastic which otherwise would have been thrown away. This could, for example, be carrier bags, bottles, bottle tops and packaging. Equally it could be other plastics that get thrown away, for example, flip flops!

We are looking forward to working with the students on this project and hope to share the results with you through the next edition of the Webberzine!

As always thank you for your support in ensuring that this is a positive day.

Yours sincerely

S Keeling

Ms S Keeling
