Dear Parents/Careers

GCSE Physics Learning platform

As part of your child’s GCSE Physics course, we will be signing them up to an open learning platform called Isaac Physics.

Isaac Physics is a University of Cambridge project designed to offer and support problem solving opportunities in Physics. This will mean that the students will be set work in class and as homework where they will be accessing problems to solve. The Isaac Physics platform will give instant feedback to the students for their answers and allow for multiple attempts where required.

Most of the problems on the website are published in a book, Mastering Essential GCSE Physics, along with some extra notes as support. We would like to supply each student with a copy of the book for their 2 years of study, with it being returned, in good condition at the end of Year 11. Alternatively, if you wish to buy a copy of the book, please indicate on the form below to be returned with a payment of £1.00 to the school shop. The school shop will also sell replacement copies for the same price if any are damaged or lost.

We aim to have all students signed up by the end of half term and will start to use the platform from the start of November.

If you have any queries regarding the use of Isaac Physics, please contact Dr Ward.
